

The Overhead Wave Ladder has asymmetrically spaced bars, which adds challenge to the activity of moving across them. Eye-hand coordination is tested in the exercise of grasping the bars, and traveling through this event makes arms and legs move in an unaccustomed fashion. This has a cross training effect beneficial to increasing overall physical strength and agility.

MBT-516 Overhead Wave Ladder

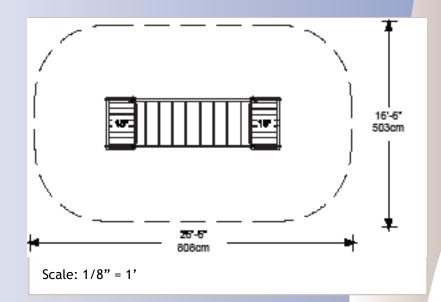

Best User Age: 5-12 Estimated Capacity: 4-6 Children Space Required, Including Use Zone: 26'-6" x 16'-6" / 808cm x 503cm Highest Designated Play Surface: 6'-5" / 196cm Hours to Install: 9 Footing: In Ground Posts, Concrete Required (est:10 cubic feet)
