RACE TRACK RUBBER CURBING

Race Track Rubber Curbing is super tough. The flexible rubber material allows for custom track shapes in any configuration. Our Race Track Curbing is extruded in 10-foot black lengths which means we can help you ring your entire track. The rubber material can be painted any color with special rubber paint and include hardware solutions for securing to your track. Engineered Curb is designed out of 100% heavy-duty recycled rubber for performance with hard-wearing durability and low maintenance.

FEATURES

- 100% durable recycled rubber
- Extremely durable: tough enough for heavy traffic
- Resistant to temperature variations, UV light, oils/fuels, salts, moisture and damage - without tearing, chipping, cracking or crumbling
- Flexible: conforms to road curvature and any asphalt or concrete surface
- Economical and easy to maintain
- Easy to install, remove and relocate - for temporary or permanent use
- Made in America

SPECIFICATIONS

- 9 lbs
- 12"W x 2.5"H at the back and 1"H at the front
- Extruded in 10' lengths
