

Standard Powder Coat Colors

TGIC Powdercoat Finish

We offer over 250 high quality TGIC powder coated colors and specialize in matching color schemes. Our powdercoat finish starts with a sandblast treatment which cleans and etches the steel surface. An epoxy primer is electro-statically applied to ensure excellent adhesion to the base steel, and to protect the steel against corrosion and scratches. A final TGIC powdercoat is electro-statically applied and baked on to give the rack the final color and an additional layer of protection.

These swatches are approximate only. Colors look different on different printers and computer monitors. If your color match is critical, please request actual powder coated color samples.

Not all colors are available for all products. Please see product literature for more information.
