### Product Description

The Doggy Fire Hydrant is a decorative fire hydrant replica intended for smaller settings just as pet relief areas in airports or doggy daycares but also adds a cute touch to any dog park area. Once you have determined the setting, the replica hydrant features a hollow core with plug that can be filled with sand or heavy material to weight it. Constructed of urethane resins and fiberglass reinforcement, this design is built to last. Each decorate fire hydrant is finished with automotive grade paint and clear coats, available in standard colors or custom colors at an additional charge.

**Please note: This unit is portable and cannot be in-ground mounted. We do not recommend using this product in an area where theft may be a concern.**
