Product Summary

Dimensions: 17"W x 36"H x 2.5"D

Capacity: 2 bikes

Frame: 2.5" schedule 40 pipe

Product Description

Based on the popular Bike Hitch model, this Meter Hitch is designed to fit right onto existing parking meters. You simply remove the meter, slide the hitch over the existing pole, then replace the meter.

The Meter Hitch has a very small footprint and is a favorite choice for its ease of use and solid bike support. Site planners also appreciate its design since it restricts bikes to parking parallel with the rack so they will not interfere with pedestrian right of way or the street.

Re-purpose Meter Posts:

Thanks to the cap options on this hitch, you're able to give old, unused parking meters in your town a new purpose.

Simply choose the capped option for the hitch, remove the unused parking meter from the pole, place the capped hitch over the pole and your old meters are now re-purposed into convenient bike hitches.

Pictured meter on top of hitch is not included. Pricing is for bike hitch pole only.
