Product Description

The **Mueller Improved Replica Fire Hydrant** is a replica fire hydrant and is our tallest decorative fire hydrant! This model has gained popularity as a display and functional piece in many dog parks across the U.S. It is intended as a prop, decorative element or just as pet relief areas in airports or doggy daycares but also adds a cute touch to any dog park area. Once you have determined the setting, the replica hydrant features a hollow core with plug that can be filled with sand or heavy material to weight it. Constructed of urethane resins and fiberglass reinforcement, this design is built to last. Each decorate fire hydrant is finished with automotive grade paint and clear coats, available in standard colors or custom colors at an additional charge.

Please note: This unit is portable but features four pass through points at the base a bolt or anchor and utilize to be surface mounted.
