## Product Description

The Whirl & Twirl spinner bowl is perfect to encourage children social interaction, as one child rides the other spins them around! The tilted design increases spinning momentum, and helps individual children use the product without having another person spin them. Features drain holes to prevent standing water, and the rounded lip allows children to hold on during use as well as aiding in transition in and out of the bowl.

- Mounts inground - Clicker option available

Requires the use of safety surfacing
