

3 Panel Cyclone Challenger

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

The 3 Panel Cyclone Challenger is play structure with a wild convergence of three curved climbing planes. It features three curved rock wall panels that have brightly colored handholds. This event is great for climbing, allowing 5 to 12 year olds the chance to climb and jump, and make up their own games surrounding this unusual climbing apparatus. This piece of equipment is great for developing hand-eye coordination, muscle strength, and other motor skills. The panels are made from heavy plastic, with a steel post in the center to give them added strength. It is perfect for use in public playgrounds and school playgrounds of any size, since the trio of double-sided panels creates six separate climbing surfaces where kids will have plenty of room to play. Kids will love running around and ducking under the 3 Panel Cyclone Climber's arches.

Product Specifications

Age Range: 5-12 years

Fall Height: 78"

Product Type: Climbing

Safety Zone: 21' 10" x 21' 8"
