

Curved Post Floating Bridge

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

The Curved Post Floating Bridge is a funky and fresh redesign of a transit utility. It's a futuristic rebranding of the bridge concept that transforms the formation into architecture kids will have read about in their favorite storybooks or seen heroes dashing across in beloved comic-book movies. The bridge's curving posts and knobby path evoke exotic wonder while its strong guardrails and netting provide easy grips for safe journeys across. On this structure, tykes will imagine themselves living out their own tales of thrilling exploration and exciting adventure. This bridge is made of galvanized steel, durable plastic, and tamper-resistant nylon encased steel cable, which should ensure the unit's stability and weather resistance for considerable years. You are not limited to the bold colors shown. A dazzling variety of alternate paints are available for those looking to create a unique scheme specific to their playground's individual needs.

Product Specifications

Age Range: 2-12 years

Child Capacity: 3-6

Fall Height: 48"

Post Diameter: 4.5-inch

Product Type: Get Physical

Safety Zone: 16' 3" x 23' 3"
