

Curved Post Pebble Bridge

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

Kids who find a playground's Curved Post Pebble Bridge will encounter a series of cleverly placed steps. Traversing these platforms requires careful balance and smart planning. The steps' rotational molded plastic features textured surfacing to facilitate shoe grip and help prevent slipping. The three platform sets (six steps total) are slightly askew from each other, gently forcing kids to challenge themselves to stay aloft at these gentle heights if they wish to completely make their way across. Pragmatic playground designers know that including such tests in an activity space is a key way to help kids evolve their kinesthetic abilities. The smaller size of the unit's footprint simplifies placement decision making. The bridge's sturdy steel poles offer hearty resilience that will ensure the equipment stays standing even after years of usage. The vibrant powder-coated colors of the structure are customizable, so you're not limited to the scheme presented.

Product Specifications

Age Range: 5-12 years

Child Capacity: 5-7

Fall Height: 48"

Post Diameter: 4.5-inch

Product Type: Get Physical

Safety Zone: 16' 3" x 20' 10"
