

# Curved Post Tilted Pebble Bridge

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

## Product Description

The Curved Post Tilted Pebble Bridge is a commercial-grade playground structure designed to be a challenging dexterity enhancing exercise that doubles as a diverting stepping game. If you're looking to help kids accelerate development of their vestibular coordination, this would be an exceptional unit to include on your organization's site. Children benefit from opportunities to play in ways that engage their balance systems and test their coordination planning. The short journey across the bridge's platforms is effortful while still being within the bounds of achievement by youngsters, which means kids' confidence will boost after successfully navigating the pebbles' safe heights. The tilted angles of the six steps are also arranged in a way that smaller children could navigate the path one at a time or bigger kids with longer strides might traverse side by side along the outside edges of the platforms. The structure is available powder-coated in the color scheme depicted or customizable in a variety of tones (custom colors available under longer delivery terms).

## Product Specifications

**Age Range:** 5-12 years

**Child Capacity:** 3-6

**Fall Height:** 96"

**Post Diameter:** 4.5-inch

**Product Type:** Get Physical

**Safety Zone:** 16' 3" x 20' 5"
