

Curved Post Tilted Lily Pad Bridge

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

Keep kids on their toes with the Curved Post Tilted Lily Pad Bridge. Kids can simply hop on the pads or they can use the bars on either of the curved support posts to quick-start their journey. The alternating lily pads present a unique predicament. They are all angled, which will promote balance and foot-eye coordination. Each of the pads has a pole running through them that kids can hold onto to guide them across. This makes it perfect for playgrounds that host kids from a wide age range. This structure is a great way to get kids to socialize, cooperate, and communicate with each other. After some practice, kids will be leaping from pad to pad with ease. Travel across the pond or trek across rocks, kids will create games and imaginary tales as they gain confidence. We offer a large spectrum of color shades to personalize this structure.
