

See Me Intergenerational Swing

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

The See Me Intergenerational Swing is a unique swing seat set that provides parents and older siblings the ability to swing with younger children. This swing apparatus can accommodate children from the ages of 6-47 months, depending on which seat option you choose. With the See Me Intergenerational Swing, young children can get in on the swing action with the extra layer of safety provided by a parent swinging in tandem with them. The swing features a chain-based suspension system that makes it exactly the sort of safe, effective swing seat that kids will love and parents will appreciate. The sturdy, powder-coated steel frame that the swing chains are attached to is more than strong enough to hold both a small child and an older child or adult, and its ingenious design allows them to swing while face to face.

Product Specifications

Age Range: 6-47 months
