

# Single Post Tilted Lilly Pad Bridge

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

## Product Description

Traversing the platforms of the Single Post Tilted Lilly Pad Bridge requires careful balance and smart planning. The steps are made of a rotational molded plastic that employs a textured pattern to help with shoe grip and prevent accidental slips. Should such a mishap occur, the distance to the ground is quite short. The bridge is meant to be a gentle play challenge and not an insurmountable obstacle. Studies show that children need periodic opportunities to exercise their brain's motor controls and learn kinesthetically. The six platforms are each a bit askew in order to slightly increase the difficulty of the path. Their support poles are all affixed firmly to the ground beneath. The solidly made galvanized steel frame is both weather and rust resistant and will hold up to years of use. The equipment's color is either available as is or with custom color choices under longer delivery times.

## Product Specifications

**Age Range:** 5-12 years

**Child Capacity:** 3-4

**Fall Height:** 96"

**Post Diameter:** 4.5-inch

**Product Type:** Get Physical

**Safety Zone:** 13' 8" x 20' 6"
