

Spider Web Climber

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

The Spider Web Climber is a unique net climber which features a spider web pattern, rather than the ordinary grid style found on most net climbers. This helps encourage children to use their imaginations as they play, pretending that they are trying to escape from the web of a massive arachnid. The web pattern gives each of the spaces between the ropes a more interesting shape, which makes them more challenging footing than a traditional net. The pattern also leaves some large spaces that smaller children will likely be able to slip through. There is no barrier on top of the structure, which allows kids to simply climb over it to reach the other side. Since the net is free standing, it is easy to install anywhere without the need for any additional structures to support it. The net is wide enough for kids to climb sideways across it, or for multiple children to climb on it at the same time.

Product Specifications

Age Range: 5-12 years

Child Capacity: 5-10

Fall Height: 96"

Post Diameter: 3.5-inch

Product Type: Climbing

Safety Zone: 19' 8" x 12' 3"
