

Straight Rung Horizontal Ladder

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

Product Description

The Straight Rung Horizontal Ladder is a straightforward overhead climbing structure with a classic design. History has just about proven that kids will always love playing on old fashioned monkey bars, and no playground can truly be called complete without them. This model features eight overhead rungs which are spaced close together, to make it easy for children to reach the next bar, especially if they have shorter arms. Those with longer arms will be able to skip rungs if they decide to do so. Since the overall length of the climber is relatively short, children will not be tired out by it and will likely be ready to try it again and again. Small two-step ladders at each end of the climber makes it easy for children of all sizes to access it, despite the overhead ladder being high enough off the ground to prevent users' feet from dragging.

Product Specifications

Age Range: 5-12 years

Child Capacity: 5-10

Fall Height: 96"

Post Diameter: 3.5-inch

Product Type: Climbing

Safety Zone: 19' 8" x 16' 2"
