

# Interstellar Incline

Meets National Standards for: ✓ ASTM F1487-17 ✓ CPSC Guidelines #325

## Product Description

The Interstellar Incline is a 3D Net Climber that is out of this world. This tangle of nylon and steel is a climbing paradise for school-aged children. A powder-coat painted steel beam acts as a balancing point that stabilizes the nylon wrapped steel; keeping parents' minds at ease while children experiment on the climber. The climber itself is large enough to handle flocks of children. Scale is shown with an average height man next to the final image. This provides kids with an organic way to build social skills along with strengthening multiple muscle groups. The center post is painted in a rust-resisting powder coat paint that can be colored in almost any shade; making it ideal for most climates and outdoor elements. The ropes themselves only come in black. The Interstellar Incline is a fun way for children to make friends, break a sweat and reach for the stars. Kids can experience a universe of wonders while never leaving the atmosphere.

## Product Specifications

**Age Range:** 5-12 years

**Child Capacity:** 50-55

**Fall Height:** 48"

**Product Type:** Rope Net

**Safety Zone:** 30' 3" x 30' 3"
